

The Oaks THE BEECHWOOD

Enter the Beechwood and note immediately a sense of real warmth and livability. Walk from the foyer to the expansive living room and dining room area, designed and sized for formal entertaining.

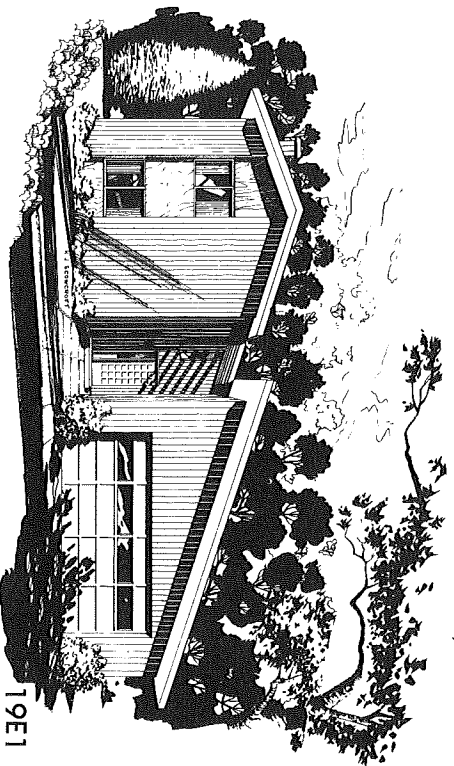

Proceed to a kitchen and breakfast room that would delight even the fussiest master chef. There's a large, inviting family room with fireplace, geared toward relaxation, and a handy utility room planned for convenience. A large, first-floor bedroom with adjacent powder room provides extra-special guest quarters.

Upstairs, you'll find three master-size bedrooms and two additional baths, including a most impressive master suite with its own balcony, step-down dressing area and bath with garden wall that is as unique as it is lovely.

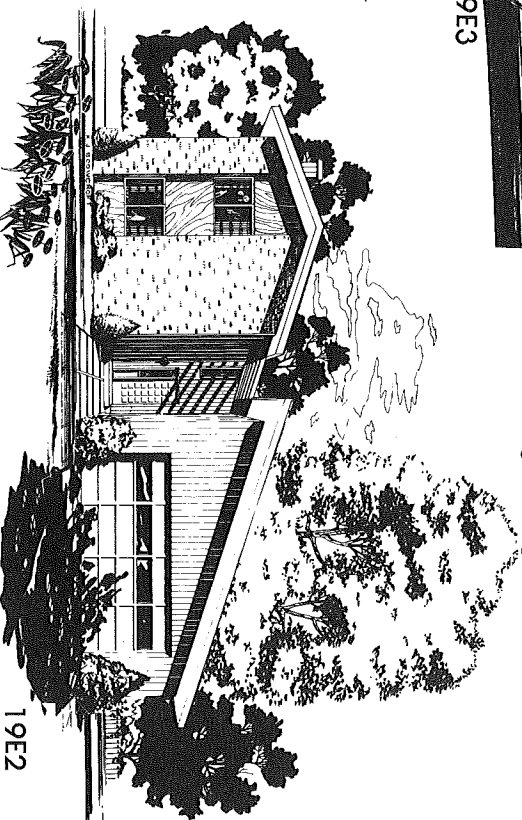

Carpeting, a double garage, and heat pump are all standard, as are energy-saving insulated glass and heavily insulated walls and ceilings throughout.
