

The Oaks THE LONGWOOD

The Longwood is a grand contemporary with a great deal of built-in warmth. From the moment you enter the living room, you are aware that this is a home sized for modern living. There's a lovely dining room adjacent to the well-thought-out kitchen. And the huge family room with a fireplace is as ideal for entertaining as it is for just plain relaxing. A powder room and laundry room complete the first floor level.

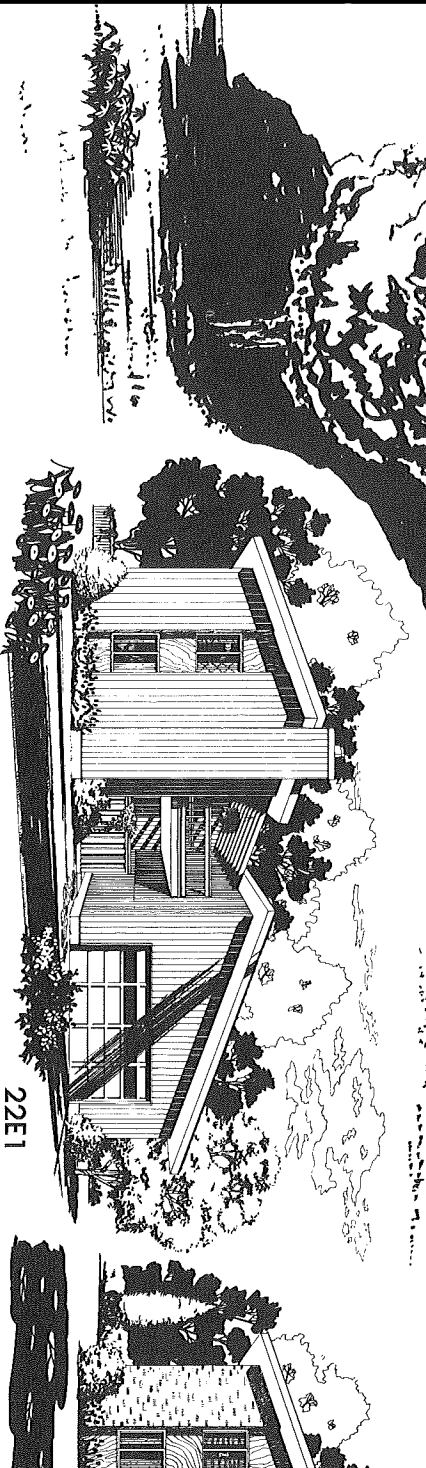

On the second floor you'll find the family living quarters. Four large bedrooms and two complete baths. The exquisite master suite features an optional fireplace and balcony. Its own, self-contained bath has separate shower stall and tub as well as an unusual mirrored garden wall.

Downstairs on the lower level, there's a large, unfinished basement with provisions for an optional party-size recreation room and an additional bath.

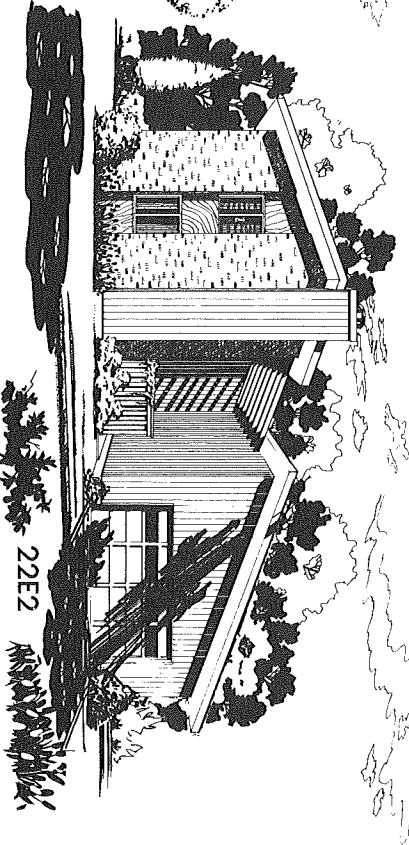

Double garage, carpeting, energy-saving heat pump, and heavily insulated glass, ceilings, and walls throughout are all standard.
